COMMENTS:

I attended the scoping meeting in Goldfield
on May 4, 2004 and provided verbal comments/concerns.
I have one additional concern: As one of the
possible routes goes near my property line, and therefore
relatively close to my house, the possibility of noise
exists. How much noise will I be subjected to from
rail line installation/operation/maintenance? How
will you abate the noise? Will this noise level be similar
to the noise level from the highway?

Please note: Your comment(s) must be received by the Department of Energy by June 1, 2004 to be considered. Comments received after the close of the comment period will be considered to the extent practicable.

If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so the address and postage-paid notice are visible, then secure with tape.

Please feel free to attach additional pages (if mailing, more postage may be needed).
